<p>As a freelance rider and groom I feel that it would be excellent to have a local indoor facility for equestrian services as it would massively benefit the equine community locally in the winter months and help to aid people like myself in riding, and generally carrying out equine responsibilities. Not only will this benefit the immediate yard and surrounding areas but also has the potential to aid the entire village and towns in bringing more people in to help boost our local economy and impact the wider industries in which operate. The yard in question operates with the riding for the disabled charity/organisation which entails tutoring and supervising of disabled people or people with learning difficulties when on horses or around horses. This indoor arena would provide a safer and warmer place for these people to train and ride their designated horses and generally creates a much better environment for both the tutors and the students.</p>
