I think it is important that we build genuinely affordable houses in the Holme valley because there is an extreme shortage of such properties and there is an evident need. Although this particular site is in a green belt area it is actually a, brownfield site, not greenfield. The area is not currently attractive or much used., so granting the application for this site would be an excellent use of the land. The application has been carefully presented and has addressed all the problematic areas. For example the removal of the tarmac area will eliminate flooding. Having affordable Eco homes in our area will be an asset to the local community.
