Further to my previous objection I have now read Ecoholmes biodiversity report. They intend taking a 5.5m x85m piece of the football field for planting grasses and wildflowers and part of the lower field/school playground to minimise the percentage of biodiversity loss due to concreting over the quarry. So they are taking our community play space by building in the quarry, then reducing the playspaces in the field and school play areas to compensate?The seeds from the grasses and flowers will blow and spread across the field and adjacent gardens too eventually surely? Cannot really believe planting grass on existing grass and reducing childrens play spaces both on the field and whilst at school can be considered eco. Madness!
