While Kirklees as a whole is in need for affordable housing I am not sure what impact building JUST TEN houses on this site will make. • I firstly object to the fact that the site is designated Green Belt. • There are plenty of large brownfield sites in the Valley and surrounding area that would be more suitable and could be considered for affordable housing. • Building on this site will result in a loss of habitats of local ecological value and will risk the disturbance to nesting birds and other wildlife. • Scholes is a small village and the infrastructure is overburdened - sewers/water/roads/parking. Will the village cope with even more housing? • The village has already been over-developed. • Roads are busy and narrow and there are a lack of pavements. I note that a traffic survey was carried out around the area - during HALF TERM between 8.30am and 4pm - which is not a true representation of the amount of traffic passing through Scholes. Due to all the above I strongly object to this development or any housing development on the Chippings site.
