I welcome the building of not only affordable housing but also housing built with sustainability and the future front and centre. I wish this was prioritised more in all developments within our area. There is a dire need for housing which is affordable to younger people and first time buyers in this area which needs to be addressed and this level of sustainability and quality should be championed and demanded throughout the Holme Valley. I worry that the majority of the objections to this project are based on nimbyism and a narrow minded view about the “wrong” sort of people moving into the area. We should continue to fight strongly against the overcrowded, profit driven, unsustainable and insensitive developments which blight our valley and its character however this development should be lauded and seen as a minimum standard for future building in our valley.
