This is a welcome application for a small development of energy efficient affordable housing, in an area which is really short of such housing. Its close proximity to the local school makes it an ideal site for affordable family housing. The size and look of the development means it does not impinge much on the surrounding area, and should not adversely affect the character of the area. It is small and adjacent to the built-up area, so again should not significantly affect the surrounding attractive open space and countryside. The size of the development means it should not be an issue in highway terms. I totally support this application as providing a helpful solution to much needed housing in a careful and considered way. The attention to solar panels and energy efficiency is also really important for lower cost energy bills for the future and should be a key requirement of every planning application.
