This land is not a safe proposal for buildings of any type...especially not the proposed 10. The road structure would not support safe traffic action..it's a dangerous narrow access point. The land is currently home to excessive wildlife. This has not been considered at all in the proposals. Possibly protected species seen (bats). The quarry nature means that extensive drilling will be necessary to install appropriate drainage...not eco friendly at all, which is supposedly the purpose of the build.
