The ten houses proposed by EcoHOLMEs on the Chippings site are exceptional. They address a local need for low energy affordable homes for rent by people who live and work locally- based on social rents allocated on the basis of need. The design proposed will be acclaimed within the the region. Built to Passivhaus principles they will have air source heat pumps and demonstrate a sustainable model of house building fitting for the energy crises and climate change. Other commendable features that fit well with modern living include communal parking, cycle storage & sheds. The designers are also sensitive to natural light, to the fit with local buildings and to the potential ecological impact. I cannot recommend this proposal more highly.
