I object to the planned development on the grounds that this area is green belt land and I see so many dog walkers and children using the land. I see so much wildlife that would be lost when I walk past. I also feel unsafe crossing the road to get to the land now so by adding more houses and more people, particularly children this would be much more risk of accidents happening. I regularly walk with my sister past the land and in winter it is almost always under water. Where does that water go when more houses are built? Surely there are better sites for affordable eco housing in our area.
