The site being on a dangerous blind bend with limited pavements and site lines. Resident parking on the roads already mean that traffic has to straddle the centre line when negotiating the bend. An entrance on or in close proximity to this bend would compound the safety/danger issue. The increased traffic from this development will further strain the already overburdened traffic flow of Scholes, especially on school days, rush hour and on the weekend when the road is full with visiting cars from the nearby cricket ground. The traffic survey conducted by Ecoholmes during off peak hours in the school holidays. It states these surveys should be carried out in a neutral environment and not during school or public holidays, therefore this survey supporting the planning MUST be rejected.
