My only concern regarding this development is that, historically, the area close to it had a thriving bat population. My family has witnessed their presence for 3 decades. It is with some sadness that we have noted that, for a number of years now, although they have been seen on The Knowle, we have not seen them flying in the area close to Abbey Cottage. Is it possible to make the provision of suitably located bat boxes a requirement of Planning Permission being granted? It might provide the encouragement the bats need to thrive once again.
