<p>Heckmondwike people have had to put up with substandard facilities for too long, so this application is welcomed. Having looked carefully at all the documents, the following points need clarification:</p> <ol style="list-style-type: none">1. Have the bus drivers/operators confirmed that the layout is practicable from a driver's perspective? Bus stand 6 appears to require a multi-point turn entering from Royle Fold.2. This site is very draughty, open to the main wind direction in winter. How windproof is the design of the walkway/bus stands structure? Design seems to create a wind tunnel, which would be unpleasant for service users.3. Landscaping looks good on paper but in reality Kirklees Council struggles to afford/maintain existing green spaces. Design needs to be vandal proof and need minimum maintenance to remain looking respectable. Green roofs have died in summer 2022 due to lack of water- how will green roofs be watered if dry hot summers continue?
