---

I object to the rear extension the proposed plans mean that we will lose the view and natural daylight that we have benefitted from the 20 years we have lived here .
Also this was the family home and was purchased in 1965 when the house was built ,view and light have been always been uninterrupted for all this time.
We also have had access to wash our bay window and maintain clearing our gutter from the rear of property on the boundry line for more than 20 years .
The size of the proposed extension will be overbearing,and the height of the roof is too high.it will also block light to our garden and will cause problems for maintenance to the bay window.

Kind Regards
