Date: 28 December 2022 11:49:25

I am a neighbour of the building site and the relevant points are valid to us .

- 1) our private water supply runs through the building site and this has been tapped into and used and we need to make sure this is disrupted as was previously!!
- 2) access road is supposed to be sorted before building commences
- 3) wall running along side canal needs rebuilding as taken too low (mentioned in last planning application)
- 4) control of building site - illegal burning of their rubbish - leaving site unlocked - no health and safety - no toilets !!
- 5) the electric cable has been severed which serves the street lamp going over the canal hence no light
- 6) Bat house - what is the situation with protecting the bats ! They still fly around so they are still here . Is there a plan to monitor the protection of them
- 7) what about the original mill stone which was supposed to be used for the rebuilding - that has disappeared gradually being sold no doubt - what are they going to use to do the development then .
