Apologies I pressed send in error.

My address

Please find photographs attached showing where the boundary fence is.

Based upon the current plans I object to the application as it is currently.
As the proposed plan would include part of the extension being in our garden.

This would consequently result in damage to the fence, trees and vegetation there and would reduce the size of our garden..

Regards

Subject: Planning application

Good morning,

I have received a letter regarding the planning application 2022/93260.

The plans show the extension going along the full width of the property.

Our garden and fence cover part of the area covered on the plan for where the extension will be.

It states in the application that no trees or vegetation will be affected however they will be as the extension will be in part of our garden which has trees and plants in it.

The plans in place are incorrect due to the fence boundary and our garden, both of which would be affected under the current proposal.

I do not wish my address to be published.
