

146 Meltham Road, Lockwood, Huddersfield, HD4 7BQ – 1st October 2022

Tree Number	Species	Height (m)	DBH (mm)	Crown Spread (m)	Physiological and structural observations	Work recommendations	SULE	Priority
T1	Sycamore	18	650	12	A tree in decline with and sparse crown and dieback. Closer inspection reveals the presence of a concerning decay fungi called Kretzschmaria Deusta. This can lead to brittle and sudden failure.	Option 1 – Fell to ground level Option 2 – Reduce crown to a pollard framework and monitor	<10	1
T2	Lime	22	1100	10	Some deadwood throughout crown, particularly a few larger pieces at around 14m. Otherwise a reasonable tree largely free from defect.	Remove deadwood and epicormic growth.	50+	3

DBH – Diameter at Breast Height

SULE – Safe Useful Life Expectancy

Priority 1 – Tree or part of tree is in very poor condition and is a significant risk to person or property and should be dealt with as soon as practicably possible. Work may also be legislatively required for example obstructing the highway.

Priority 2 – Something that has fewer consequences than P1, for example a small dead tree that may not kill someone but could cause minor injury or damage property – works within 3-6 months

Priority 3 – Normally only in the interests of amenity good management and normally at your leisure.
