<p>The entrance to the site isn't wide enough and is having to use a public pathway. How's that going to work when some ones walking up the path and a car or site machinery comes flying out?</p> <p>How is site machinery supposed to get onto site. With such a small entrance? The site will need heavy machinery and large tipper skips with all the digging that will be required. How are they getting on in a safe and legal manner?</p> <p>The proposed property location doesn't meet the government legislation on the required distance it's need to be from the existing property boundaries! Of all 7 (Severn) existing properties facing the site.</p>
