Good afternoon,

I have just received a letter to notify me that my neighbour has submitted a variation to their plans.

After reviewing the amended plans I can confirm that I am not happy with the additional frosted window that has been added to the basement bedroom. This window is on the boundary wall of our property's and will therefore look straight into our garden and cause an invasion of privacy.

I am more than happy to discuss this matter further with yourselves and will gladly show you the impact it will have on our privacy if you wish to come and view our property.

Please note that the neighbours did try to enforce this window without the relevant permissions.

I look forward to your response

Kind regards
