<p>The woolpack inn is the last amenity in the village, since we moved here in 2014 the woolpack has been a valuable part of introduction to the village, it provides a place of communication for some of the older members of the village as well as been a social hub for others,</p> <p>Not only would the planning application be a huge detriment to the area for loosing the village pub but the proposed application shows many flaws, Whitley road despite being 30mph is fast and used as a rat run, the access suggested on the park side of the building is not sufficient to supply the development and has a category A tree to the opposite side which should not be damaged. There is a distinct lack of parking which would result in parking on either Scopsley lane or Whitley rd neither of which would be suitable.</p> <p>There is currently a national push to make sure that rural communities do not get left with out the connections and facilities that the rest of the country benefit from and taking this away from the village would be doing the exact opposite of that.</p>
