<p>The pub is a historical and community asset as it is used as a meeting place for villagers walkers cyclists and the wider community.</p> <p>The proposed accommodation would have a negative impact on road safety and highway safety due to increased usage and parking on what is already a fast busy road .</p> <p>The dwindling amenities in Whitley do not support an increase in its population. To lose the pub would mean there is little else within the village. How does a community thrive and grow when there is nowhere else to go?</p> <p>Other local pubs are doing well and this could with the right level of commitment and drive given its wide catchment area.</p>
