| <p>I object to the application to carry out what is open cast mining in order to build on this land. Over the past 3 years we have had to endure significant disturbance involved in the groundworks for the 6 houses in planning application 2017/93792. This involved noise vibration and dust caused by the movement of significant amounts of soil. Any open casting or large scale excavation of this site will result in significant disturbance to those of us who live nearby. This will be in the form of dust and coal dust, noise, vibration and possible impact on the water course and movement caused by the disturbance of old mine workings. There are a number of studies linked to the long and short term impacts of open cast mining including health issues linked to short term exposure to coal dust and dust as well as noise. I cannot see anywhere on the application reference to a health impact study. It is clear that this land is not suitable to build on without causing significant impact on the living conditions of those of us living close to the site.</p> | |
