Addendum to Highways Comments

Just been looking at the proposals for the Huddersfield Rail Station Connections Scheme (second Stage Consultation) documents and I've noticed that there is a proposal to make the dropped kerb on John William Street adjacent to the hotel site in to a full loading bay along with the footway being widened with a pedestrian crossing just beyond this towards Brook Street. This will make access to the loading for waste collection easier as the footway and the north bound lane would no longer be partially obstructed during waste collection.

Cheers

Chris
