Dear Sir or Madam,

I am writing to object to the planning proposal for a 5G telecommunications mast at the top of Wood Lane. I strongly believe that this proposal should be rejected for several reasons.

Firstly, the proposed site is within close proximity to several listed buildings and it would have a significant impact on their visual appearance and heritage value. These listed buildings are an important part of the local heritage and must be protected. The mast would be an eyesore and detract from the architectural significance of the surrounding area.

Secondly, the mast would also have a negative impact on the quality of the adjacent village green. The village green is an important open space for local residents and is well-used for recreational activities. The mast would detract from the peaceful and picturesque nature of the area, and would be out of keeping with the local landscape.

Furthermore, I am also concerned about the design of the mast. Its brutalist design does not align with the picturesque nature of the surrounding area, and would stand out in a negative way. This would have a negative impact on the local visual environment and the character of the area.

Lastly, I am concerned about noise pollution from the service cabinets associated with the mast. This could cause significant disturbance to local residents and would be a major inconvenience.

In conclusion, I strongly urge the planning authority to reject this proposal. The proposed site is in close proximity to several listed buildings, the mast would detract from the quality of the adjacent village green, the brutalist design is not in keeping with the local area, and there are concerns about noise pollution from the service cabinets.

Thank you for considering my objections to this proposal. I look forward to your response.

Yours faithfully,

171 Longley
