Dear Sirs,

Proposed 5G mast in Longley/Lowerhouses,
Planning Application No 2023/90052.

I write to object to the above planning application, to construct a 50ft high 5g phone mast and cabinets, beside the bus stop at the junction of Wood Lane / Longley Lane / Fanny Moor Lane.

- ① The mast is to be sited in a small area of green space, where children play + many residents have concerns about radiation emissions near their homes. These emissions are a public health concern not resolved.
- ② The mast will be totally out of keeping with the group of listed cottages, together with Longley Old Hall (Grade 2 star) It has previously been regarded important to preserve the historic nature of this area + should be so now.
- ③ The mast will be sited close to Longley Woods Nature Reserve + so presents a danger to wild life, some endangered, + also trees etc.
- ④ There is already a high mast nearby, at the corner of Hall Cross Road, so we would be living between 2 high masts, causing emissions + noise in the area + is another health concern.

Yours faithfully
