Do you wish your comments to be published on the website anonymously?	Yes
<p>faces the proposed property. We believe the intended use of the property will cause major traffic issues and pollution, it will interfere with resident parking as many park their vehicles at the rear of their property due to there being limited options on the main road (Halifax old Road). There is already an existing problem with parking and access due to the mosque visitors, this will only be heightened.</p> <p>exit property from the rear and only access transport from the rear which faces the proposed property.</p> <p>Further to this, the complex will cause a lot of noise pollution which will directly affect the residents nearby. Also there is a high likelihood of anti social behaviour taking place either when users are entering or existing the proposed premises.</p> <p>There is also likely to be a heightened level of air pollution due to the larger quantity of vehicles that will be in the area. It is likely that wildlife will be negatively impacted as there is currently a lot of biodiversity of many mammals and wild birds around the embankment that is to the side of the proposed property which extends all the way across the Jack Hill. It is likely this will be heavily impacted and reduce the natural balance that currently exists.</p> <p>It is also likely that property values will be negatively impacted and reduced due to the imposition of the intended use. Also the likelihood of increased litter and environmental issues will soon become a problem as will the knock on impact of the presence of rodents.</p> <p>Due to the intended use and the consequent increase in traffic there is a high risk of road/traffic issues as many of your children use the back lane as access to shops and residences or on journeys to school etc. as mentioned there is already an ever increasing issue surrounding traffic at peak times around the area, this will only add to the problem and likely to cause more incidents.</p>
