The proposed dwelling is dangerously situated with regard to access To the north the entrance and exit are obscured by an outbuilding immediately adjacent to the road situated at a tight bend Travelling north to south there is no line of sight until the last moment There is no footpath to protect pedestrians entering the property Exit from the extremely small courtyard is tight and blind The bonnet of a normal car would have to push out into the road before the driver could see left or right The road itself is increasingly busy due to urbanisation of the area It is a major route from honley centre to holmfirth and outside the honley 20 mph zone along which many cars travel too fast Overflow parking from the property will be on the road causing further dangerous congestion The exit is directly opposite field end which is a private road Vehicles particularly farm traffic such as tractors with trailers and the daily milk tanker exiting from field end do so with difficulty even at the present time . From a safety point of view as a retired honley GP spent working to preserve life and health in this area I would recommend an on site inspection by relevant Kirklees officers particularly from the highways department to evaluate the real risk here and consider options I have some roadside photographs available to yourselves
