Part 1: Applicant details

Name of applicant/agent	Paul Matthews ARCHITECTURAL - agent Mr Innes MacArthur - applicant
Site Address	37 New Hey Road, Huddersfield, HD3 4AL
Description of Development	Removal of flat roof and formation of pitched gabled roof to existing detached garage

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Building Regulations only applies to the structural works on this particular application.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
The proposed natural stone wall to be used for the new gables along with the Blue slate roof covering will be locally sourced and is a totally recyclable material.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

<p>Whilst no EVCP is proposed at this current time as the applicants don't have an electric vehicle, should the case arise an appropriate EVCP will then at that time be installed</p>
<p>Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)</p>
<p>Part L of the Building Regulations does not apply to this application. The existing and proposed building is unheated so no thermal insulation is necessary or required.</p>
<p>Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)</p>
<p>N/A</p>
<p>Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)</p>
<p>An existing drainage point will be used for the surface water run off.</p>
<p>Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)</p>
<p>The small scale nature of this project does not lend itself to providing/incorporating ecological works/proposals.</p>
<p>Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)</p>
<p>Locally sourced materials and contractors will be used wherever possible/appropriate.</p>
