

CLIMATE CHANGE STATEMENT

Location	Adj to 323/325 Dunford Road, Hade Edge, Holmfirth, HD9 2RT.
application	Demolition of Dilapidated Outbuildings and Erection of Detached Dwelling.
client/applicant	Mr & Mrs J Dalton.
job number	22/781.
date	March 2023.

ARCHITECTURE | PLANNING | DESIGN

Malkin Farm

Company Registration Number: 09898149 - Company Registered in England and Wales

Part 1: Applicant details

Name of applicant/agent	Paul Matthews ARCHITECTURAL - agent Mr + Mrs J Dalton - applicants
Site Address	Land Adj to 323/325 Dunford Road, Hade Edge, Holmfirth, HD9 2RT
Description of Development	Demolition of Dilapidated Outbuildings and Erection of Detached Dwelling

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
This proposed dwelling goes above and beyond the baseline/minimum requirements of the building regulations in relation to the conservation of fuel and power along with the carbon footprint of the dwelling. Numerous low carbon aspects have been integrated into the proposals. Building Regulations applies to this application, subject to a formal approval a Building Control application will be prepared, this will require formal compliance with the Building Regulations.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Natural stone, resulting from demolition, will be set aside for reuse within the development (walling/dry stone walling). All proposed materials (stone, blue slate, timber, etc) are all fully recyclable.

Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

An EVCP is proposed as part of the proposals.

Surface water will be harvested for reuse.

An air source heat pump is proposed to provide heat for the well insulated proposed dwelling.

A large solar array is proposed to the purposely orientated South facing roof slope to provide natural heating for a hot water tank that will be within the roof space of the proposed dwelling.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

As noted within Q1 – The proposals goes above and beyond the minimum requirements of the Building Regulations in relation to the DTER (Dwelling Target Emission Rate). The integration of renewables will result in allow carbon property with a very good thermal efficiency/Energy Performance Certificate).

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Flooding does not apply to this proposal although the proposed connection of the surface water to the mains system removes the current arrangement of surface water, form roof areas and hard standing areas running off onto the adjoining highway.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Surface water will be harvested on site for reuse, reducing the reliance of fresh water.

All appliances will have restricted flows to reduce the water consumption of the proposed dwelling in relation to, and achieving compliance with the Building Regulations.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Whilst the site does not fall within the 'bat alert layer' on the Kirklees gazateer system we are open to discuss integration of bird boxes or other worthwhile biodiversity enhancements as part of the works.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

An EVCP is being provided to the frontage of the proposed dwelling, this will promote the use of an electric vehicle as opposed to current traditional petrol/gas vehicles.

Appendix B – Further information

Kirklees Local Plan

The development plan for the Kirklees Council area (www.kirklees.gov.uk/localplan)

Planning applications guidance and advice notes
