Having already objected to the above planning on Primrose lane I would like in addition to submit some photographs taken on Thursday 7th March. My property 45 Darley Road caught fire from a faulty electrical appliance. Luckily this been at the top end of the road the fire service were able to attend quickly. However further down maynot have been so lucky as the fire engine struggled to get down. Not just due to parked vehicles but also vehicles travelling up and down.

This road is already like a race track.

I have also attached daytime pictures which shows cars parked and vehicles trying to get up and down.

Even if yellow lines were put on how would this be policed on a regular basis.

Regards
