

Dear Sirs

I would like to object to the proposed development on Land off, Primrose Lane, Hightown, Liversedge WF15.

I was originally against the development when it was for 67 dwellings, which I thought was an over development of the site and now I see

the developer and council want to build 77 dwellings.

I have read most of the site reports and I notice that the coal and water reports also have objections against the current plans. My main concern is still the one access point to the

site from Darley Road. I read in the traffic report, the parking on Darley Road was also highlighted as a problem, and what was the solution? Double Yellow lines. That's just totally insane.

If you paint yellow lines to stop the parking on that section of Darley Road, where pray tell are those cars supposed to park because there it would appear there is no provision for off-road parking!!

I'm sure there are many Brown field sites that could be developed before the area has to lose yet another section of open space!!

Yours
