<p>I oppose the development and believe it will adversely affect the character of the area as being family friendly. The increased traffic up and down Darley road will impact the safety of children playing out and walking to and from school - not to mention all the noise and disruption the building work itself will cause whilst ongoing. It's impractical that all the wagons and building materials will only have 1 way to enter and exit the site in a residential area.</p> <p>It's also already an issue to exit the estate when we experience ice and snowy conditions as there's only 1 way out up the hill of Darley road which gets very icy, this will only increase having 60 more households to contend with, there should be an alternative road out to ease the number of cars having to use the same entrance/exit on Ripley Road.</p> <p>Also the suggestion of introducing yellow lines onto areas of Darley road to ease congestion will impact the living conditions of elderly residents and those with small children, who currently park outside their homes rather than in one of the allocated car parks further away. The allocated parking spaces in the car parks only account for 1 car per household will mean that 2 car households will have to park further away up the street and therefore still increasing parking congestion on other parts of the road.</p>
