<p>Dear Sirs, I'm writing to object to the plans which are being proposed in the field between Darley Road Liversedge and Primrose Lane.</p> <p>Firstly, the area is a wonderful place for the preservation of the natural environment in this area. Any further building in the area will have a terrible effect on it. There are many trees which encourage a variety of wildlife, including that from many miles away. Swifts use the area to build nests and add their offspring.</p> <p>The blackbirds, woodpeckers, and many other British birds depend on the wildlife to feed their young.</p> <p>There's also squirrels, foxes moles and many other livestock which depend on the area as it is.</p> <p>All this would be catastrophic for the wildlife should the trees be destroyed, plants removed which they feed on and protect them.</p> <p>We have other self set trees which provide lots of fruit.</p> <p>The noise, disturbance and odour would be unbearable. There are many families with young children next to the field which would be affected by such conditions from the area. Chest complaints especially will increase amongst them and the senior citizens who live close by.</p> <p>The noise, disturbance and highway safety are a big concern too. Children are not aware of traffic etc and this could lead to unthinkable results should there be a large amount of vehicles up and down the narrow, windy road.</p> <p>Many houses will be overlooked by the new buildings all around the field, including our own. This will be overlooked by the new houses. This means our living conditions would be unbearable. A lack of sunlight, daylight and privacy would be atrocious and a disruption to all us.</p> <p>Finally, I'll ask again that you reconsider this development in this area.</p>
