<p>Dear Planning,</p> <p>Please accept this message as a firm objection to the proposed new development.</p> <p>As a existing resident on Darley Road and directly affected by the development... the affects it will have on increased traffic, pollution and many environmental effects to residents and wildlife - is too great a price to pay...</p> <p>I am both shocked and disturbed that even more green belt is been considered in this day and age - especially when there is plenty of brown field land that is available for additional housing in the Kirklees area with infrastructure in place - ready to go.</p> <p>However, I know that brown field land comes with risks to developers with unexpected costs (e.g. contaminated land) therefore cheaper to rip up the grass, trees and wildlife habitats.</p> <p>Maybe the council/planners should encourage brown field regeneration first - before looking at green belt ?</p> <p>Also, with a additional 200+ extra residents - this will put additional strain onto the local schools and health care facilities - which are already at breaking point.</p> <p>I trust this objection is documented - in the strongest terms possible.</p>
