• There will be a 1.8-meter privacy screen on top of the extension (terrace) which would obscure the view and reduce the amount of sunlight/daylight coming into our property on the lower floor where our kitchen dining space is and on the second floor where our living room is located. • The plans do not show our property and it looks as if the proposed extension runs along our boundary line. We cannot see how this extension can be built without going on to our property? We would anticipate the building would need away from our boundary line to allow the builders to erect the extension. • There is no mention of materials on the plans, we are concerned that the choice of materials may affect the nature of the semi-detached house. There are only 2 of this type of semi-detached houses on this road, this will look very different from everyone else's and change the nature of our house. • The rear part of the proposed extension goes into the cellar, we share a wall and we are concerned about structural integrity.
