

Species Enhancement Statement

Proposed single storey front kitchen extension at 7 Delph Lane

Netherton, Huddersfield, HD4 7HQ for Mr P Howells

The land on which we are proposing to construct the extension is of low value in respect of biodiversity and is currently a section of small lawn with no shrubs or trees.

In line with government policy it is proposed to provide the following species enhancement features. These consist of a House Sparrow nesting terrace Forticrete or similar manufacture and a proprietary wall mounted Bat nesting box both of these will be installed a eaves level on the west elevation.

The locations of the nesting boxes have been indicated on the scheme proposal Drawing 3.

I trust that this will be adequate in this instance
