Subject: Objections to 2023/91225 /92255 land at Green Acres Close.

Wentworth drive the Entrance (from upper lane) and route to the site location is inadequate and dangerous. Often parked on by many from all over the village (re snow) or visiting the pub. Also there are no road marking at the junctions. Causing major safety issues.

1. Vehicles from west avoid those parked on upper lane opposite to approach on wrong side of the road to turn on Wentworth drive which is single lane due parked cars.
2. These also cause a further danger to vehicles as they have to leave Wentworth on wrong side of the road to face head on big site traffic. See pic to follow

Upper lane parking and no road markings cause an extremely dangerous 3 lane traffic scenario as scene on attached picture. One lane in parking middle lane is west bound but used by east bound traffic. The as black ranger rover the west bound lane in Wentworth drive at 90degrees to it as a third lane of upper lane.

The police allow all parking in contravention of highway code because (they say) the council told them it's ok
