I wish to object to the proposed quarry development at Bromley Farm Quarry as I feel this will have a huge impact upon the Villages of Lower and Upper Cumberworth for the following reasons; natural environment, noise, pollution and traffic. The development would impact upon the natural environment of many animals/birds including badgers/deer/bats/woodpeckers and Owls . The semi rural location of Upper Cumberworth is the main reason we choose to live here and access to wildfire within their natural environment is an integral part of living in Upper Cumberworth. The A635 is already a very busy road and HGV's leaving and entering the site every 6 minutes will be extremely harmful to the air quality and noise and safety to the local area. It states that the HGV's will be use the site between 7am- 6pm Monday - Friday and Saturday 7.30am - 1pm Saturday therefore it will be continuous noise and disruption. Pollution : alongside the pollution from traffic(HGV'S every 6 minutes)Dust, clay and shale are very dusty therefore this will impact upon the air quality. I note that the Governments National Planning Policy Framework states that planning decisions need to enable and support healthy life styles with the increase in traffic/ noise and dust pollution how can this development support a healthy life style ?? I believe the council should decline this application there is no benefit to the community in fact it will have a detrimental impact upon the local community . 86 Barnsley Road Upper Cumberworth
