| <p>Objection is based on several factors.</p> <ul style="list-style-type: none"><li>• The development will significantly add to HGV traffic, causing diesel soot, increased emissions and air pollution.</li><li>• The development promotes open cast coal and shale mining which actively works against Kirklees' Council's vision to be 'net zero and climate ready by 2038'.</li><li>• Close proximity to the school with which air pollution and significant levels of dust will impact the health and growth of 126 primary children.</li><li>• The development proposed will be a highly populated residential area, housing children, older and vulnerable people, impacting negatively on their health and wellbeing through noise, air and traffic disturbance.</li><li>• The main roads used by the HGV's is a school route. Local children will be walking to and from school on a route where the speed limits are already way above what they should be and are not enforced by police making these roads highly dangerous.</li><li>• Carr Hill road will be used by the HGV's due to the dangerous crossing (poor vision and high traffic) at the Sovereign. This is a residential road, heavily used by children, elderly, walkers, dog walkers and cyclists. There is limited pavement and no pavement for half of the road. The 30 mph speed and 3.5tonne limit is not enforced. Day and night residents already see a high volume of HGV traffic who use this road as a rat run. This will increase significantly if the development is to go ahead, likely resulting in fatal collisions. Local residents will protest, Kirklees Council, Highways and police will likely receive a high volume of complaints.</li><li>• The development has no benefit to the residents of Cumberworth and surrounding areas.</li></ul> |     |
