We strongly object to the proposals as referenced above. Apart from the further road activity and unfavourable change to the environment where we live, we were greatly upset by the similar work that was conducted behind us at the quarry near Bromley farm. We had no end of dust and dirt which resulted in having to clean almost daily inside the house never mind the outside and it was noisy. During this period I had to increase my asthma preventer inhalers due to the unreasonable amount of debris and material in the air. This had such a negative effect on our quality of life and health for such a long time and so we really understand the negative impact this quarrying work has in the local area. Please can you do everything in your power to make sure that this work never starts in what is a mainly healthy living area with many families and communities happy with the clean air. Kind regards,
