Postcode:	S36 4HG

User comments

Type of comment: An objection	
Do you wish your comments to be published on the website anonymously?	Yes
Approval of this application will cause significant deterioration to the living conditions and quality of life for many local residents through the quarrying and transport increases and the wider area through increased heavy duty truck movements. There will be significant increase in noise (both quarrying and transport), disturbance (quarrying and transport), and the activities will lead to damage to the air quality and state of the roads through degradation and mud/dust. This is when the rest of the country ,in various guises, is trying to improve our air quality and reduce bronchial and pulmonary illnesses.As a country we recognised the danger to the environment of coal mining and the subsequent burning of coal over the last forty years so for you now to approve the open cast mining of shale, clay and coal and then its transport on heavily polluting diesel lorries would fly in the face of all current best practice. If indeed you do approve this shameful application how can you reconcile that with your commitment to a Net Zero and Climate ready Kirklees by 2038? People will then rightly question whether your environmental, local community, and ethical concerns are no more than empty words and that,indeed,money talks.
