I would like to object against this planning application because of the 120 hgv waggons per day would be detrimental to the area quality in the area as its within the proximity of the junior school which sits within a conservation area. The pollution would be harmful to the children. This type of development in a residential area is unwanted and undesirable for all but the developer (who is not from the area). Kirklees has the following stated strategic aim 'our aim is for net zero and climate ready kirklees by 2038. Approving a development for open cast mining adds considerably to diesel emissions in the roads and promotes open cast mining cannot be compatible with that stated aim.
