I wish to object to the proposed quarrying activities at Bromley Farm Quarry for the following reasons: The increased number of HGV vehicles and associated movements accessing the proposed mining site will add considerably to local traffic. The issues of traffic in upper Cumberworth have been picked up on numerous occasions with local ward councillors and senior officers. The roads between Upper Cumberworth and Crow Edge are not suitable for HGV traffic would seriously impact on the small communities along the route such as Five Lanes End. Noise pollution and air quality would be detrimental to the health of the local population. The general effect on local traffic, the added congestion at the Sovereign crossroads and Carr Hill Road is already a serious problem. Often lorries do not use existing A roads but take the shortest route possible be that B roads or smaller this is already an issue and in part contributed to the council altering the usage of Carr Hill Lane. This will only get worse. For the reasons stated above I believe that the Council should refuse this application as there isn't enough benefit to the area for what will be 25 years of disruption, noise, dust and pollution.
