I would like to object to the proposed quarrying activities at Bromley Farm mainly due to the very concerning increase in heavy traffic going past out house and through our village several times a day. Barnsley Road is already a very busy road with no speed limit and there have been several accidents on this road. A few months ago my daughters car was written off due to an a vehicle driving into it when it was stationary outside our house. Vehicles come down the road too fast and there are already lots of heavy vehicles from early in the morning including farming vehicles. There is also a school just round the corner from the post office with lots of children there and also at the bus stop to go to Scissett Middle School in the morning. It's unthinkable what could happen given the potential amount of vehicles coming past. We can get snow and bad weather up here and the roads can be covered, it's an accident waiting to happen in the bad weather (even on a fine day). There are already several dangerous junctions near the site, especially Sovereign crossroads and the roads are just not made for this volume of traffic. They were built for horse and carts! I walk my dog on footpaths near the tip and this crossing would be a death trap with more heavy traffic. Upper Cumberworth is a rural area and the proposed quarry is totally not in keeping with the surrounding area. We live far from HD1 household waste site and Bromley farm is therefore a busy amenity for us. There are already often queues for the tip, how would this volume of traffic work with the addition of all the heavy vehicles? We are all advised to spend more time outside for our mental and physical well-being but this will pollute the air and also be too noisy to encourage us to be out in our gardens and enjoying the peace and countryside we came here for. This application should be refused.
