

Dear Sir or Madame

I wish to object to the  
proposed quarry at Bromley Park

Planning application number

2023/62/91280/EO

The roads that lorries are due to travel  
on I do not believe are suitable for the  
amount of transport that will be using them.

The 'Rat Run' that is Carr Hill road is already  
at breaking point in the morning and evening  
peak periods. There is no pavement on  
much of this road and there are many pedestrians  
who use this road for a variety of reasons  
eg walking children to and from school

Accessing the village shop and Post Office for  
which there is no parking near.

Dog Walking

HGVs who use this road often find  
using it difficult due to parked vehicles on both  
sides of the road.

The amount of pollution caused by the  
lorries themselves and the dust from the clay and  
shale being carried is completely against the  
Councils aims on the environment.

In view of this kirkstall planning has no alternative  
but to reject this application if it is not to throw out  
the Councils environmental policy

Yours sincerely
