I object to the amount of heavy vehicle traffic that we will see coming down Penistone road and into New Mill Village centre. I have safety concerns from the amount of traffic we already see through New Mill and the damage that has already occurred to safety railings and the bollards in the centre. The infrastructure does not support heavy duty vehicles which are mainly uncovered will have an impact on the road surface as we currently don't see enough road weeping happening along the whole of the proposed route. The sovereign cross roads already a danger spot due to poor visibility and the slippery road surface from the mud debris around the junction. New Mill has already seen traffic lights being installed which is good but amount of near misses and people speeding through the centre of the village in large vehicles and riding through red lights is already bad. Safety should be the number one priority.
