Dear Sirs

2023-91280 Bromley Farm Quarry transport Vehicle & Wheel Washing

### OBJECTION

There is no details of the wheel washing

Objection : **a bath does not clean adequately for the highway**

A planning condition should be a full drive-through automatic washing for side/underbody, chassis Tyre and wheels system

The size of the auto-wash system should be specified to include all vehicles; including cars, leaving site

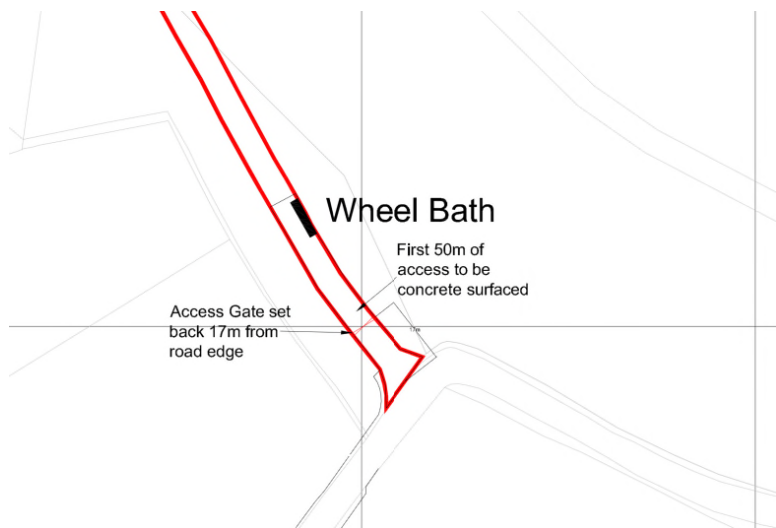

There is no Bund facility shown

There is no indication of additional water IBC's/tanks to supply the clean water

There is no system showing storage tanks how they clean / recover debris cleaned & any water used

There are no site lights shown so that drivers may inspect the vehicles are clean before entering the highway

There are no additional cross-drainage channels indicated on the sloping access road, so that water coming from the vehicles is channelled away into a soakaway and NOT directly onto the highway

The developer's proposal is less than a standard expected, for a site that if approved would be operational for a number of years

Many Regards
