Response to Milieu Developments Comments regarding parking Comments

RE: Response to Highways Development Management (HDM) Comments

As a resident on this section of Somerset Road and categorically state that the response from Milieu Developments with regards the parking is an absolute fabrication and some of the photos have been taken of the wrong area, this section is the only section OF Somerset Road that has houses on both sides and therefore the only section of road that should be included in the photos even though they are time stamped (which can be added after to picture) this can not be the time stated and I would ask for proof

Photos on Broadway around the corner are not affected by this parking issue as most of the houses there have their own driveways for off street parking and some on Somerset road do already use this as an overflow if they cant park on Somerset Road.

As for the comment about irresponsible parking I find this unbelievable as people park where they can where spacers are short and some cars move and others take their place, that's normal, but I will say that if people park irresponsible now this will be made worse if we loose 2 spacers where the kerb is dropped for this house.

The developer has offered to pay to have the disabled parking bay moved at their cost but this can only happen if the owner agrees and I don't believe this will happen.

During the day we have extra cars parking here, Donaldsons vets use this area as staff are not allowed to park in their own car park and we get cars parking here for workers in Huddersfield town and people that are using the train, so they park here and walk to town and get free parking every day, we cant stop them but this does cause an issue for residents.

The attached photos are to show that over three consecutive evenings that there are no spaces on this stretch of road which is the only stretch of Somerset road where there are houses on both sides of the road with NO off road parking.

Taking photos is usually a matter of perspective and timing but I would suggest that the council or the highways department do their own impartial surveys as definitive proof of the parking issue on this stretch of somerset road
