<p>Objection to application number 2023/91327</p> <p>Strong consideration should be given to the disruption that building this dwelling will have on the traffic during construction – as stated previously the rear of the property is unsuitable for heavy machinery and the back lane does not join to this property therefore there is no access at the rear for offloading or parking.</p> <p>All machinery and skips will have to park at the front, where we have a disabled bay blocking half of the entrance</p> <p>Residents parking, where do residents park during the construction...?? its difficult enough to find a space to park at 5pm as Donaldsons vets and town workers use this area as there are no restrictions and its free, but when the builders park their machinery here and cone off the area to reserve parking for their vehicles, we (as residents) will have nowhere to park for the whole of the construction and parking is at a premium.</p> <p>The disruption to traffic on this busy road will be catastrophic for the area if the builders use traffic lights as hundreds of vehicles use this road and it's a constant stream of vehicles, as this is a main road and bus route up to Almondbury, Longly and Lowerhouse's and reaches out to other areas.</p> <p>The parking of site machinery will cause people to park on the opposite side of the road as there is no restrictions here and this will cause traffic jams with or without traffic lights, the reason nobody does this now is because of the safety issue and possible damage as cars do drive down this road faster than the speed limit as the speed bumps don't slow anyone down on this road.</p>
