

Key

-  The Planning Application boundary (the Site)
-  Existing contours mapped from ground mapping, drone and historic plan reference
-  Existing trees and large (mixed) scrub vegetation
-  Areas of existing lowland heath community (retained)
-  Areas of existing lowland heath community to be stripped, temporarily stored and re-spread
-  Areas of existing grassland (modified and lowland dry acid grassland type) to be retained
-  Areas of existing scrub vegetation (ruderal, nettle and willow herb)
-  Other areas of vegetation
-  Former extraction area/quarry feature and other areas of exposed stone
-  Existing pond
-  Phase 1 primary operational area (other engineering and restoration work may take place beyond boundary)
-  Phase 1 area of landform reduction to achieve restoration profile
-  Phase 1 area of landform increase to achieve restoration profile

PHASE DESCRIPTION

Phase 1 comprises work within the central area of the quarry. Existing areas of open mosaic habitat (OMH) will be stripped (circa 0.1m depth) and the soil placed into temporary storage bunds (circa 2metre high) as indicated. Stone for re-sale will be placed away from other site works and the landform adjusted to achieve proposed final contour level. Infilling of the existing quarry void will also commence.
