<p>As the owner of The Counting House Nursery situated next door to this application I object for the following reasons:</p> <p>We have an outdoor area to the rear of our property which is where our children play out every day, all year round. This proposed development would significantly overlook those children playing and that concerns me from a safeguarding and child protection point of view. There would be no way to control who is in the property (residents or visitors) and what their intentions are.</p> <p>Similarly parents of children attending my nursery would not be happy that their children can be watched whilst at play, in what is supposed to be a safe and secure environment. Allowing the play area to be overlooked no longer allows me to say confidently to parents that it is a safe and secure environment for children.</p> <p>The degree of privacy that is needed for young children to play would be lost with neighbours overlooking.</p>
